Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Document US-A-6 064 905 (cited at p. 1, l. 14 et seq. of the subject application) as closest prior art discloses a medical system for detecting heart events comprising the features of the preamble of claim 1.

The problem to be solved by the present invention is to overcome the signal detection problems of multi-dot electrodes described on p. 2 of the subject application.

The solution achieved by the present invention resides in the provision of a processing means determining a synthetic reference signal as defined in the characterizing portion of claim 1.

None of the cited documents addresses the above-mentioned problems or gives a hint towards the inventive solution.

Consequently, claim 1 and dependent claims 2-13, which relate to preferred embodiments of the invention, meet the requirements of Article 33(2)-(4) PCT.
